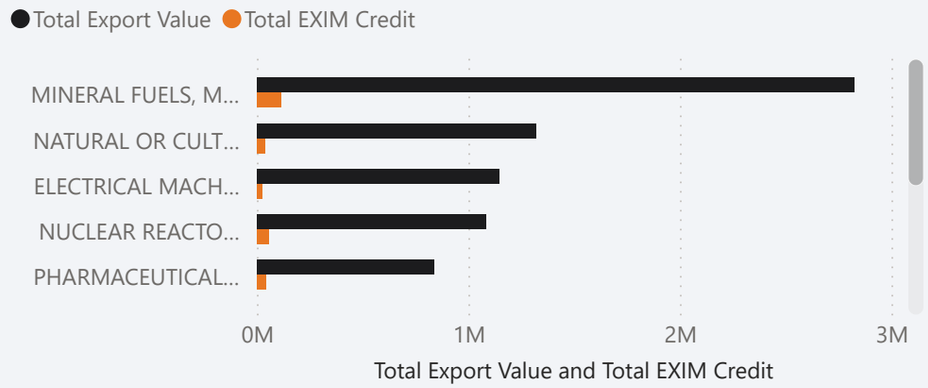
Where is EXIM credit concentrated?

Does credit align with export leaders?



Where is credit allocation inefficient?

Executive Insight:
A consistent gap exists between export scale and EXIM credit across most sectors, indicating broad under-financing.

Implication:
The issue is systemic (low overall credit support), while true misallocation is limited to a few sectors.

Action:
Increase overall credit deployment.

Strategic Recommendation:

1. Expand credit coverage beyond top-funded sectors to address structural under-financing.
2. Prioritize high-growth, high-demand sectors identified through aggressive growth scoring.
3. Reallocate capital toward underfunded sectors with significant rank gaps.
4. Avoid over-concentration in already well-funded sectors.
